

ICU#4 – Innovation and Sovereign Wealth Funds, Method, raw clusters and reference list

1. Method

1. This ICU is based upon a semantic analysis of about 12 000 articles from international Press Agencies, newspapers and specialised journals, collected from 20 June to 20 December 2008. By definition, all results presented are 'as of' the period concerned.
2. In addition to Press Agencies News and to specialised journals, the newspapers are the most important ones of about 20 countries: China, Denmark, France, Germany, India, Indonesia, Ireland, Israel, Italy, Japan, Korea, Russia, Spain, Sweden, Swiss, Taiwan, Turkey, UK and the US. On the whole, about 65 sources were monitored for this ICU.
3. The articles are collected because they contain root word: "innovat*".
4. In addition to innovat*, the articles analysed for this ICU contained "sovereign" AND "fund". 48 articles in the database correspond to this set of criteria and were therefore subject to the semantic cluster analysis.

2. Clustering

Cluster 1: bank, wall street, finance, week, asset, derivative, crisis, regulator, fow (24 documents)

Cluster 2: Trade, Reserve Bank of India, Ministry, tariff, inequality, talk, country, inflation, office, mainland (18 documents)

Cluster 3: Lenovo, capitalism, right, champion, norm, corruption, firm, multinational, IBM, culture (6 documents)
